OF CROSSBOW PRECISION

TO OUR CUSTOMERS

From the beginning, our passion for bowhunting & innovation has fueled us in looking to the future, always asking "what-if" & searching for ways to help our customers be more successful in the field.

Even now, having shipped over 1 million crossbows since 1994, the same guiding principles that drove our company then, continue to drive us today - Family Owned & Built in America.

Our commitment to these principles allows us to design, engineer, & build better crossbows than large multi-brand corporations who don't truly know & love the sport. From ownership & management to our skilled team of employees, we are passionate bowhunters who understand the hunt boils down to a game of inches, & we take great pride in being part of your success.

From top-to-bottom, our 2024 lineup breaks boundaries & sets new standards in crossbow speed, accuracy, durability, & performance. As we usher in A New Era, you will find that our lineup not only includes the fastest crossbows in the world & the most compact hunting systems on the market, but also budget-friendly, performance-driven crossbows. Simply put, our 2024 lineup has a crossbow for everyone at every budget, & we look forward to sharing in your success this year!

Good Hunting,

A NEW ERA

NEW ACU-LOCK™ SCOPE BRIDGE
 25x stronger than traditional scope rails, the **NEW ACU-Lock** Scope Bridge provides the ultimate foundation for scope stability. The full-length, dual-mounted, machined aluminum bridge allows for more scope adjustment, heavier scope options & provides maximum in-the-field durability.

NEW CENTERPUNCH HPX ARROW WITH SNAP-IN NOCK
NEW Alpha-Nock HPX snaps into the TriggerTech trigger box & allows you to hear & feel that your arrow is properly locked & loaded.

NEW ACUSLIDE MAXX™ (PATENTED)
 The pinnacle of crossbow cocking & de-cocking. Stronger, smoother, & easier to operate, the patented ACUSlide MAXX features the Auto-Brake Gear System. While cocking & de-cocking, you can remove your hand at any point & the handle will stop in place.

NEW AR-STYLE AMBIDEXTROUS THUMB SAFETY
 Conveniently located directly above your firing hand, the safety is effortlessly activated & deactivated with the thumb – allowing you to keep both hands on the crossbow & eyes locked on your game.

NEW TWIN-RISER TECHNOLOGY™ (TRT)
 Foundation of lethal accuracy. 41% lighter & 2x stiffer than traditional risers, **NEW** Twin-Riser Technology is designed with symmetrical top & bottom plates that reduce riser flex & limb torque to generate a more consistent arrow flight path for greater down-range accuracy.

NEW TRIGGERTECH PRECISION TRIGGER
 Each facet of the TRX 515 & TX 440 is designed to extract every millimeter of accuracy from the crossbow, including a newly developed custom hand-built TriggerTech Trigger. Using TriggerTech's patented Zero-Creep Technology™, this 3 lb. trigger features a clean, crisp "break like glass" feel to improve accuracy & precision.

NEW ZERO-TRAC BARREL
 Rail-less design reduces weight & eliminates arrow friction leading to straight nock travel & greater down-range accuracy.

NEW GUIDE-LOCK™ ARROW REST SYSTEM
 Features three points of contact for security & stability. The arrow rests on two, "never-wear" spring-loaded ball-bearings & is held securely in place by a top-mounted retention brush – giving you durability, longevity, & maximum precision at any distance.

NOCKS

ALPHA-NOCK HP & NEW ALPHA-NOCK HPX

DESIGNED FOR INCREASED STRING-TO-NOCK ENGAGEMENT & SAME HOLE DOWN-RANGE ACCURACY.

TenPoint's Alpha-Nock HP & **NEW** Alpha Nock HPX features a deep bowstring groove, a large smooth radius base, & elongated ears. The string on TenPoint's extremely narrow crossbows wraps tightly around the center of the nock resulting in straight nock travel & precision down-range accuracy, while minimizing string serving wear.

The nock's deep channel design increases the string to-nock engagement by 28% & "holds" the bowstring in place during the shot which prevents "shoot-over" or "shoot-under".

The **NEW** Alpha-Nock HPX features a Nock Retention Groove that snaps into the TriggerTech trigger box on the TRX 515 & TX 440 allowing the user to both hear & feel the positive engagement of the nock to the string.

NOTE: The Alpha-Nock HPX is required for use with TenPoint rail-less crossbows (TRX 515 & TX 440).

NOTE: The Alpha-Nock HPX is compatible with all TenPoint & Wicked Ridge crossbows.

LIGHTED NOCKS

ALPHA-BLAZE & NEW ALPHA-BLAZE HPX

TenPoint's Alpha-Blaze & **NEW** Alpha-Blaze HPX Lighted Nock contain a one-piece Nock/LED unit that is indexed with the vanes & press fits into the arrow's Aluminum Bushing. Upon firing the crossbow, the bowstring pushes the nock fully into the bushing & activates the LED light.

Deactivate the easy on/off lighted nock by pulling the nock straight out until the light turns off. The LED light system lasts for approximately 24 hours when activated.

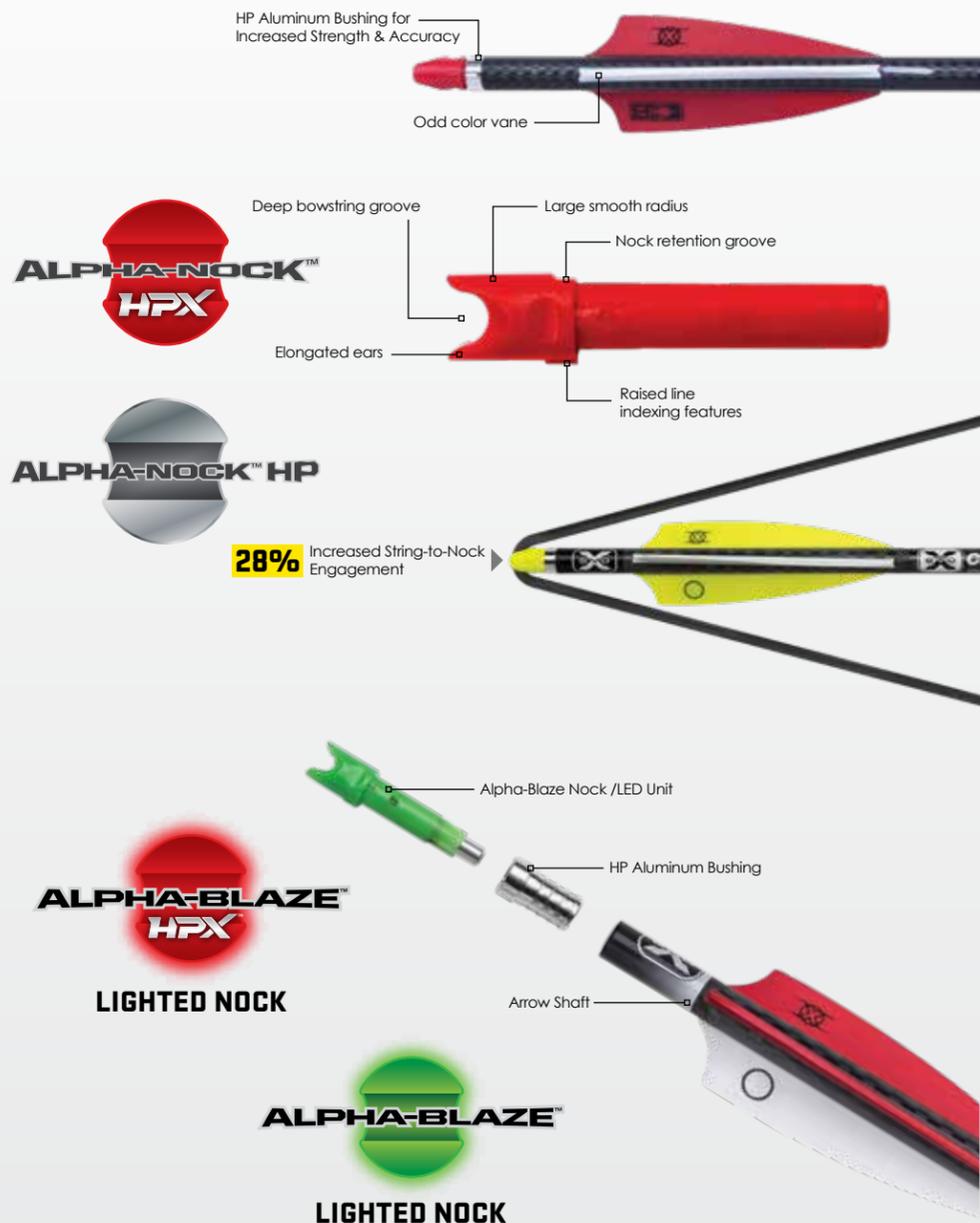

The lighted nock fits into TenPoint & Wicked Ridge arrows equipped with an HP Aluminum Bushing (sold separately).

BE SURE THE NOCK'S RAISED LINE INDEXING FEATURE IS PROPERLY ALIGNED WITH THE ODD COLORED VANE ON YOUR ARROW.

* All TenPoint & Wicked Ridge crossbows require the use of an Alpha-Nock HP or Alpha-Nock HPX Arrow. Failure to do so will void the manufacturer's warranty.

* All TenPoint rail-less crossbows require the use of an Alpha-Nock HPX Arrow (TRX 515 & TX 440). Failure to do so will void the manufacturer's warranty.

ARROWS & LIGHTED ARROWS

NEW TENPOINT CENTERPUNCH HPX LIGHTED & NON-LIGHTED CARBON ARROWS

20-INCH / 445-GRAINS (+/- 1-GRAIN) / BALANCED AT 15.5% FOC / .001" STRAIGHTNESS

Featuring a unidirectional carbon inner layer for stiffness, & a woven carbon fiber outer layer for impact strength, the arrow is equipped with the patented Alpha-Nock HPX. The **NEW** Alpha-Nock HPX features a Nock Retention Groove that snaps into the TriggerTech trigger box on the TRX 515 & TX 440 allowing the user to both hear & feel the positive engagement of the nock to the string – indicating your arrow is properly locked & loaded in the crossbow. In addition, the "snap-in" design of the Nock Retention Groove eliminates the fit disadvantages & string wear associated with "snap-on" nock designs.
